Knott App - EasyDriver

knott.pl

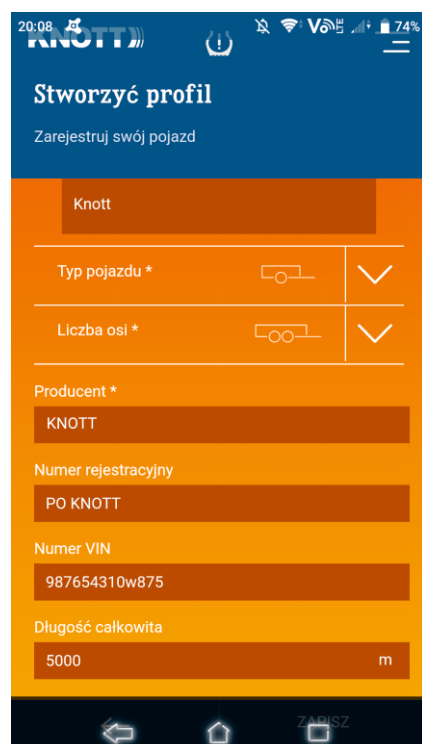

Dear Sirs,

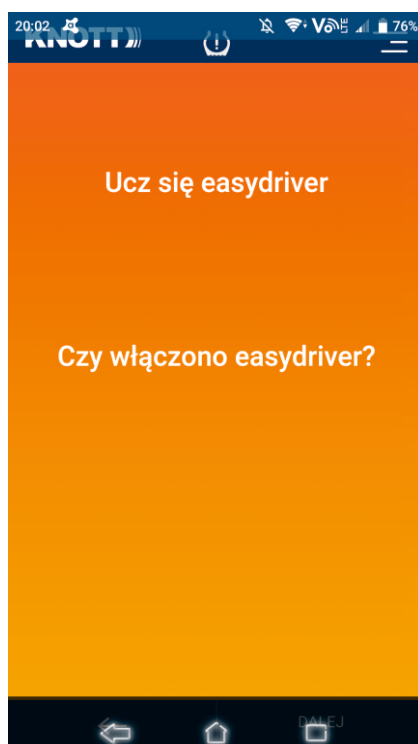

If you are the owners of parking assist systems for caravans that we offer, you can easily pair them with your smartphone. Our KnottApp application allows you to easily connect to the mover and thus it is possible to control through the application without the need for a remote control offered in sets.

It is a very convenient solution at a time when everyone has access to a smartphone and the Internet. By using our application you can forget about the remote control and it is much easier to maneuver the trailer on the camping site.

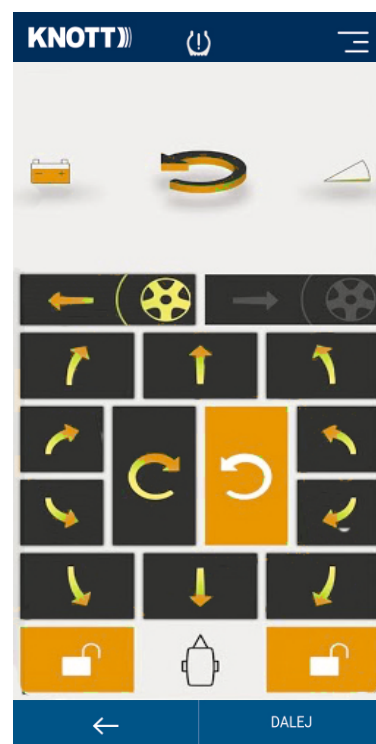

To be able to use the application to control EasyDriverem, you must create a trailer profile, and then configure the connection between the smartphone and the mover. These are very intuitive and simple operations, which makes the process very fast.

- creating your own trailer profile

- interface allowing to run the configuration

- EasyDriver operation via smartphone

Easydriver - available versions

easydriver basic

Nazwa	DMC (kg)	Ability to overcome hills (%)	Weight (kg)	Art. Nr
easydriver basic 1.8 for single axle trailers	1800 1200	15 28	33	417346.001
