Wheel chocks

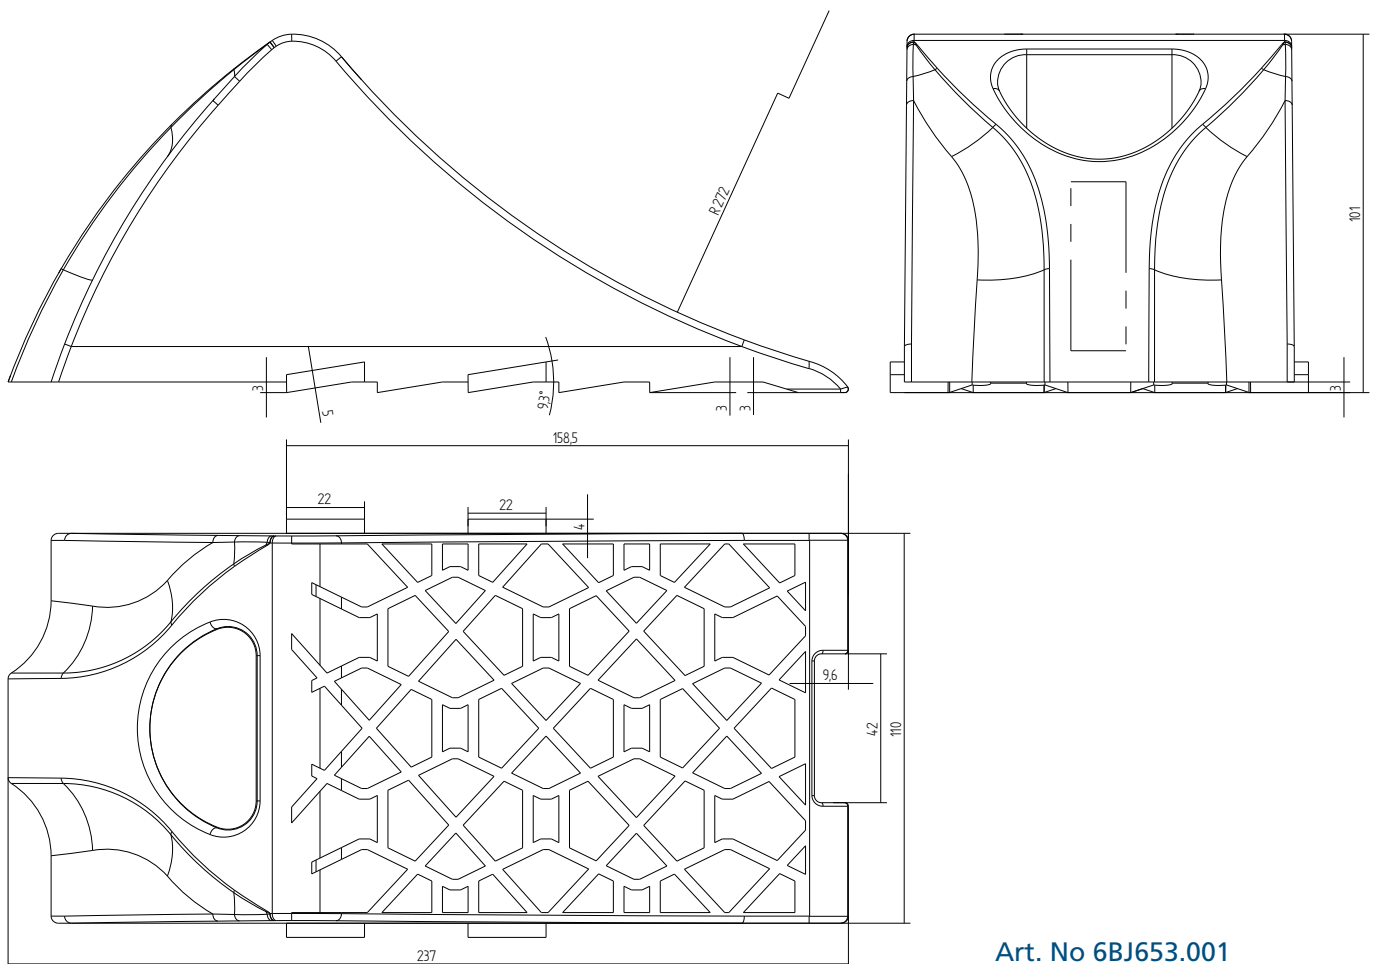

knott.pl

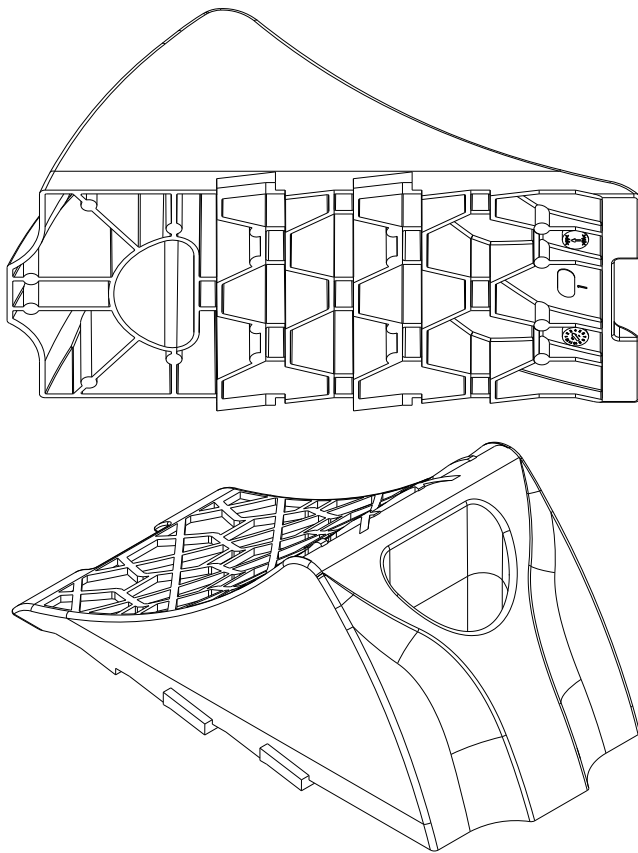

Dear Sirs,

The latest wheel chocks design is now available for sale. The applied solutions and design will surely satisfy your expectations. The special form will certainly appeal to you and attract the attention of customers. Wheel chocks are offered in two tonnage versions. The difference in load capacity results from the material used, thanks to which you get lighter wheel chocks with lighter trailers. The offered wheel chocks has holes in accordance with the standard available on the market, thanks to which they can be used interchangeably without the need to modify the holes in your products. The wheel chocks is made of durable plastic, which also provides very good resistance to weather conditions and the sun.

Art. No 6BJ653.001

The lighter version of the wheel chocks are made of durable polypropylene, thanks to which it is adapted to the weight of 800 kg - one wheel chock, 1600 kg in the set.

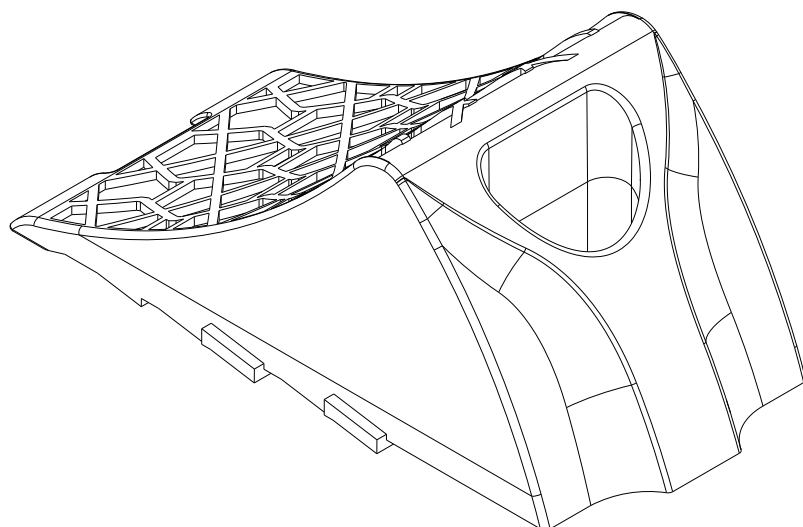

The wheel chock version with a strength of up to 1000kg - 2000kg is made of durable reinforced polyamide. Compared to standard polyamide, polyamide with glass fiber is characterized by significantly higher mechanical strength, higher stiffness, higher creep resistance and better dimensional stability.

All these features mean that you receive a product of the highest quality.

Wheel chocks are available in white and black, as well as in a version with the Knott logo - also in two color variants.

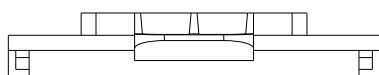

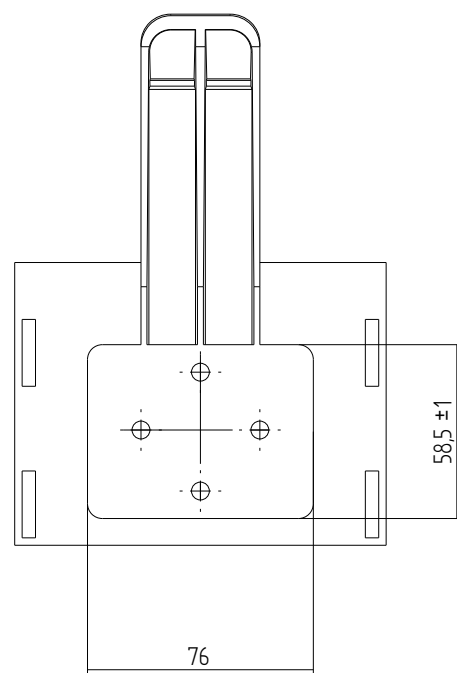

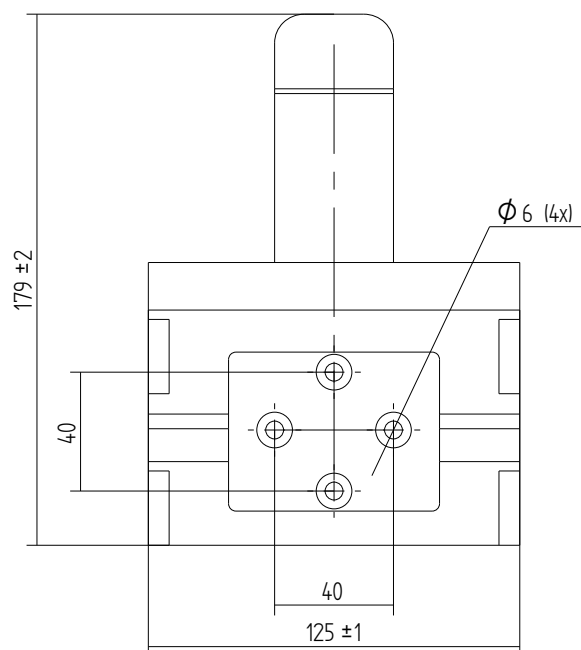

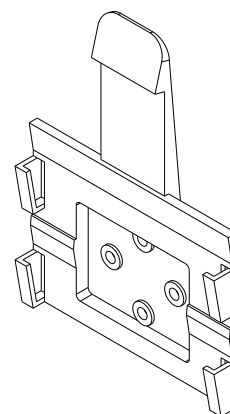

6BJ653.102	white	Knott	1000 kg
6BJ653.101	black	Knott	1000 kg
6BJ653.002	white	---	1000 kg
6BJ653.001	black	---	1000 kg
6BH886.102	white	Knott	800 kg
6BH886.101	black	Knott	800 kg
6BH886.002	white	---	800 kg
6BH886.001	black	---	800 kg

Art. No 6BH886.001

We also offer a holder for wheel chocks, which has been perfectly matched to the wedge, thanks to which it ensures high quality connection.

Removing the wheel chocks at a standstill is very easy, and the material from which it is made ensures durability of the connection even for a long period of operation.

Art. No 6BJ654.001

Below we present an example of the use of the offered wheel chocks

The wheel chocks can be mounted both on vertical surfaces, such as trailer sides or walls, as well as on surfaces such as trailer fenders.
