Drawbar „V Flange” - KZV35

knott.pl

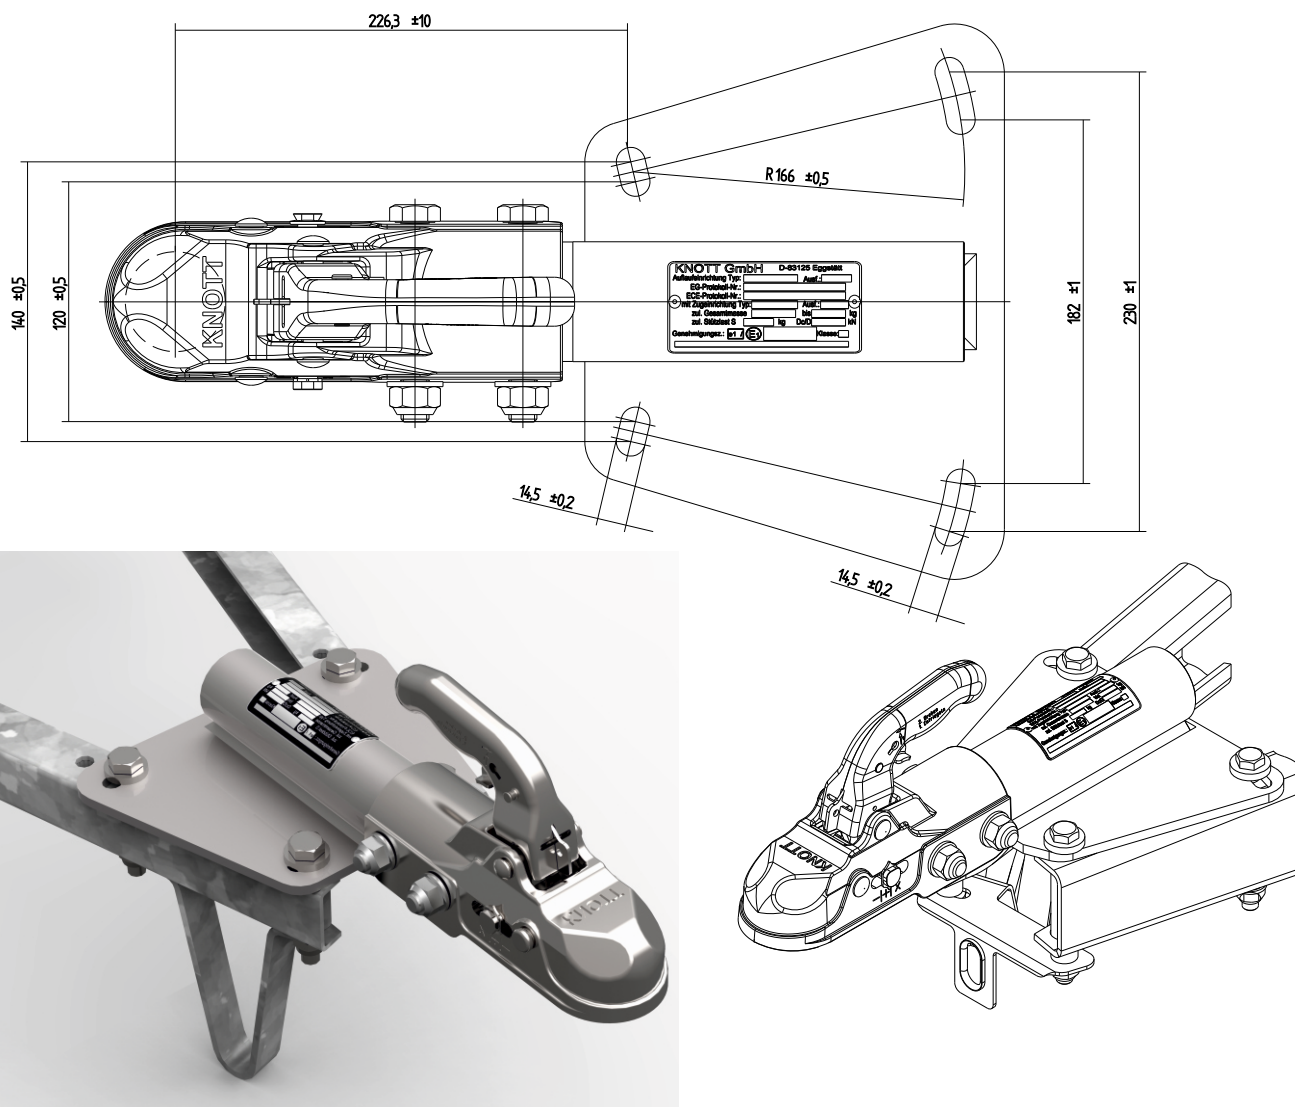

Dear Sirs,

Our range of products already offer a drawbar „V Flange” up to 3500kg - KZV35.

It is intended for coupling of a towing vehicle with a trailer, where a classic overrun device is not required. This is an interesting solution for trailers with a turntable equipped with a hydraulic or pneumatic brake system controlled directly from the towing vehicle.

The offered drawbar „V flange” can be equipped with each of the couplings and eyelets in our offer which are designed for this tonnage.

We invite you to familiarize with this product, especially because it has the approval number and is approved for use in chassis based on the EU directive.

Approval data: E1 55R- 012881
DC-Value 31 kN, Support Load 350kg

Art. Nr. 6A2309.xxx
