Jockey wheel - ATK60V - 230x80

knott.pl

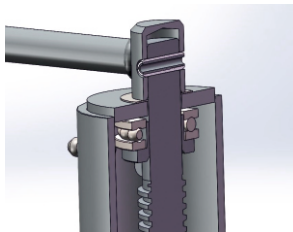

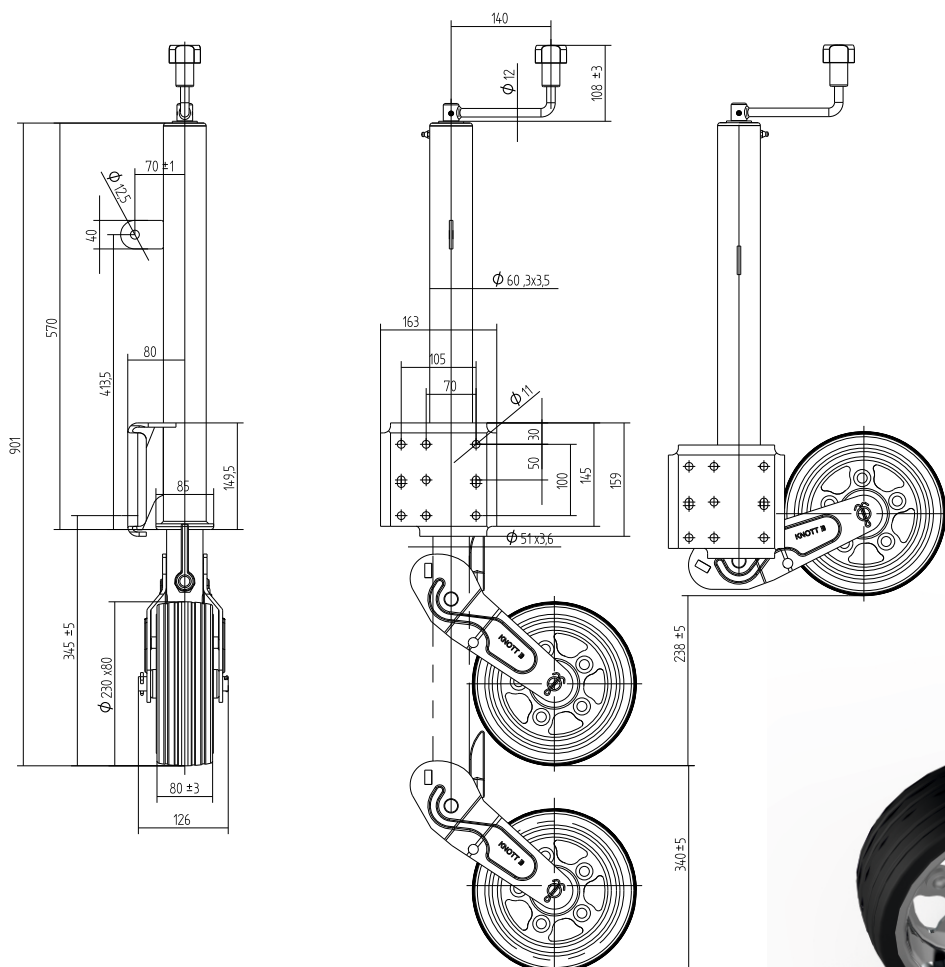

Dear Sirs,

We present the next solution of the reinforced jockey wheel. The offered jockey wheel is designed to carry loads up to 500kg. The jockey wheel connection is matched to our products, so you can successfully replace the new one currently used in the version with metal rim.

A decisive advantage of the offered solution is the 230x80 wheel, in which the tire is much smaller, which prevents any deformation in the event of a long stop with the use of this wheel.

Art. No. 421039.xxx

Reinforced wheel with steel rim - up to 500kg

Hot-dip galvanized wheel - better protection against corrosion

The ball bearing is easier to handle the wheel during parking
