Knott KK14 couplings - Change of approval number

knott.pl

Dear Sirs,

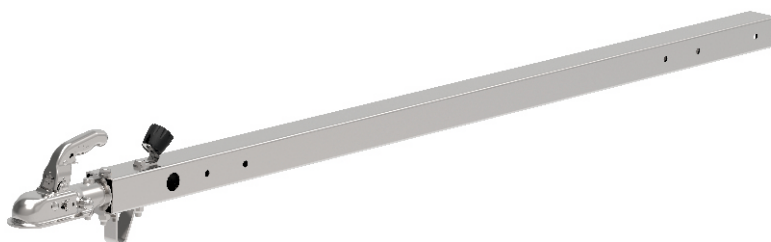

we would like to inform you that for reasons not entirely dependent on us, from January 1, 2022, KK14 couplings will be offered with a new approval number:

E1*55R02/00*3170*00 (marking E1 55R-02 3170).

The said modification is the result of changes introduced by certification bodies in the approval procedures and the departure of England from the EU. Brexit meant that it was decided to transfer the approval to certification bodies in the European Union, and this unfortunately entails a change in the approval number and markings on the product.

Considering that it is a popular coupling on the market, we would like to inform you that its use from January 1, 2022 will require changes in your 01 and 02 FTL type approval. From that date the coupling will be marked in accordance with the new marking and only such couplings will be offered for sale.

The old approval number will be valid until 31/12/2021. This is the date by which your approval should be changed in order to be able to continue to use the above-mentioned ball coupling without any problems.

Please include this change in your approvals in order to avoid problems and misunderstandings after the transition period.

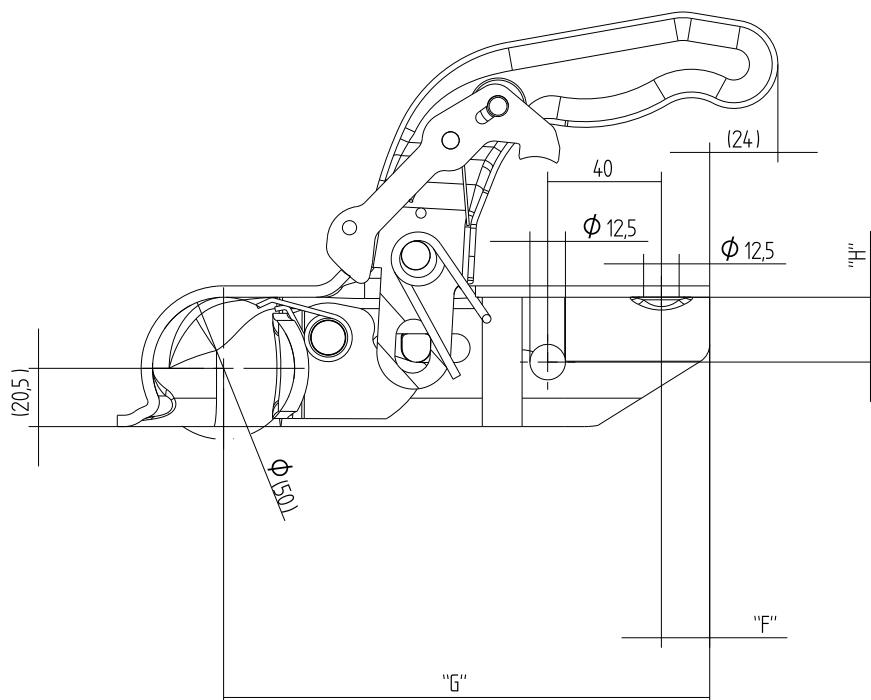

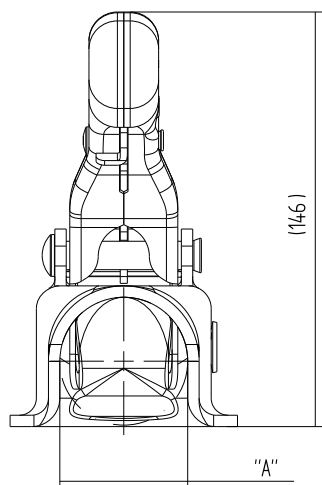

E1*55R02/00*3170*00 (marking E1 55R-02 3170).

E1 55R-02 3170

B50X S-100kg
