Wheel chock and wheel chock bracket

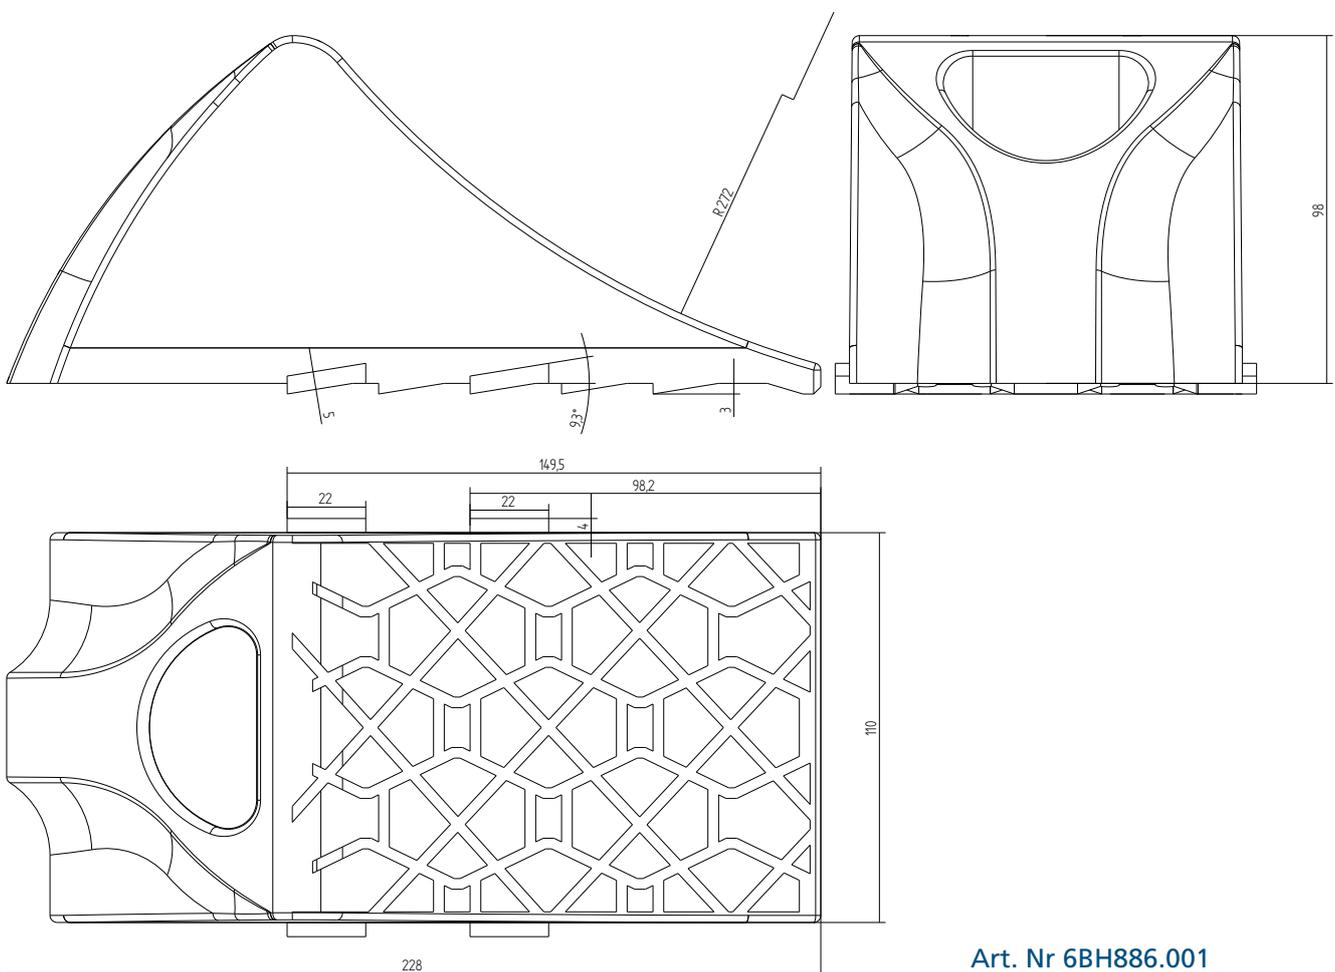

knott.pl

Dear Sirs,

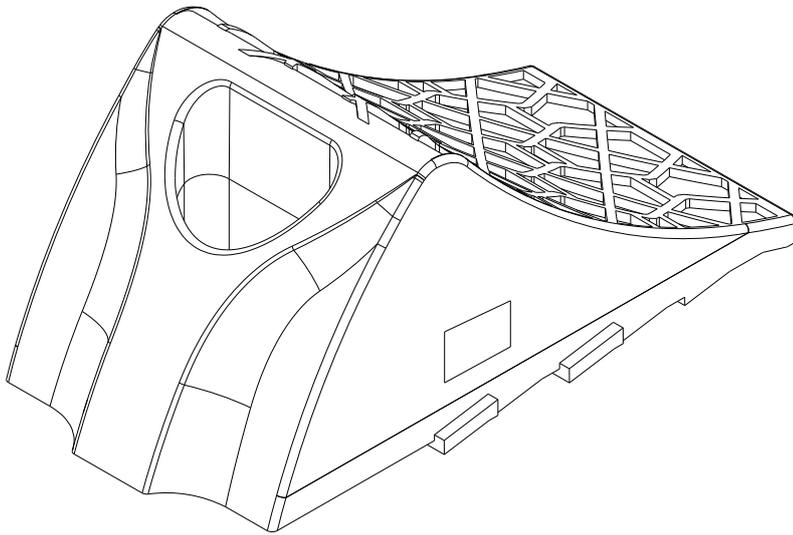

We present a novelty in our offer. A wheel chock and a wheel chock bracket specially designed for you. You will surely like the unique and modern design. The offered wedge support has holes in accordance with the standard available on the market, so they can be used interchangeably without the need to modify the holes in your products. The wedge is made of a durable plastic, which also provides very good resistance to weather conditions and sun exposure.

Art. Nr 6BH886.001

We encourage you to familiarize yourself with the new type of wedge.

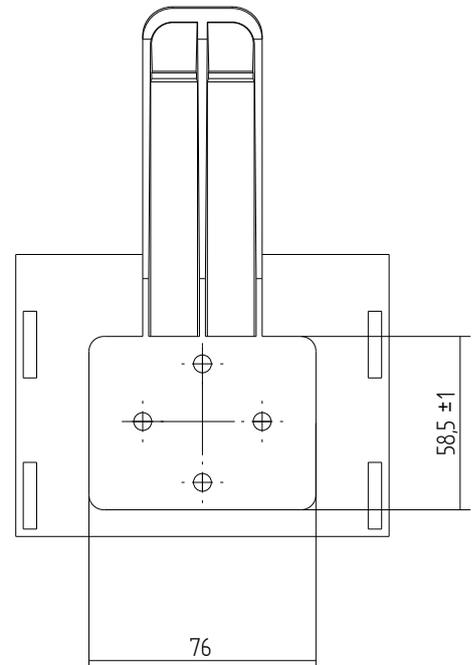

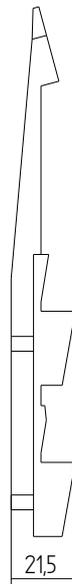

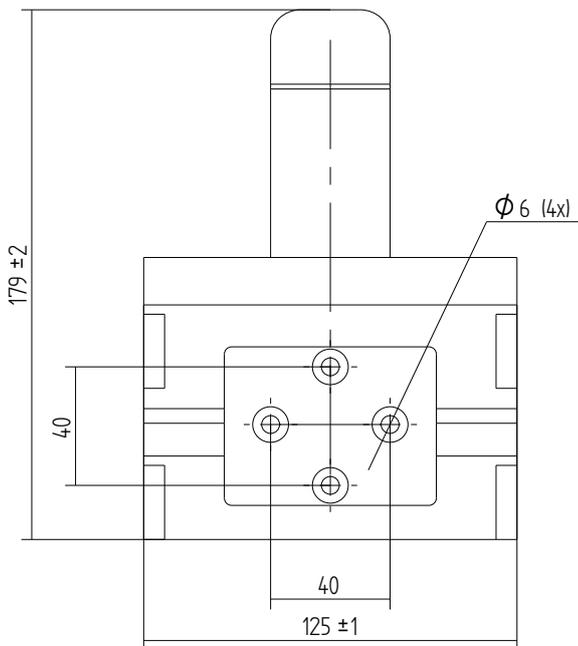

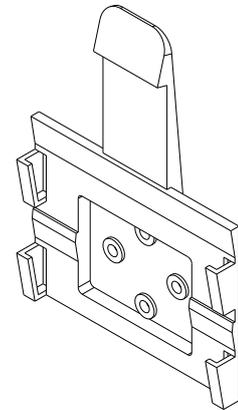

The wedge certainly differs in appearance from those available on the market and can easily fit into even the latest design of your caravans.

The wedge support has been perfectly fitted to the wedge, thus ensuring a high-quality connection.

Detaching the wedge at a standstill is very easy, and the material from which it was made ensures the durability of the connection even for a long period of use.

Art. Nr 6BH887.001

Below we present an example of the use of the offered wedge.

The wedge can be mounted on a vertical surface, such as trailer sides or walls, as well as on surfaces such as trailer fenders.

Detailed information about the products is provided by the Trade Department of KNOTT Sp. z o.o.
