The type pressure control system

knott.pl

Dear Sirs,

By extending the offered range from the premium group, we would like to offer a tire pressure control system. It is offered in a set for one axle and equipped with a wireless sensor that allows easy measurement of pressure and temperature in the wheel.

The set is configured so that you can easily mount sensors on wheels in a very easy and accessible way, and then through a mobile application pair them with your phone.

The system transmits information about the pressure and temperature in each wheel via Bluetooth technology.

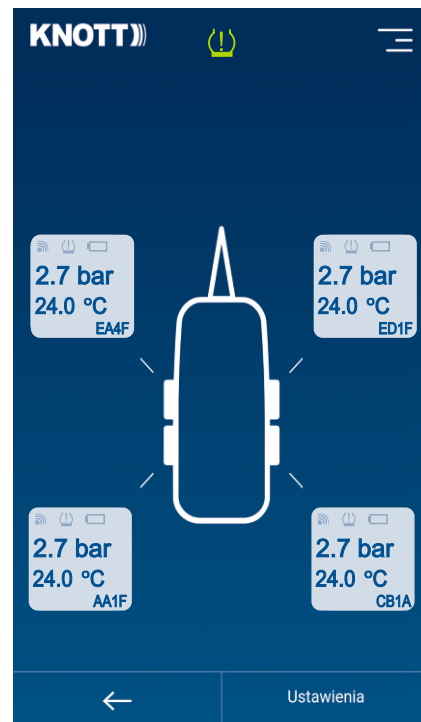

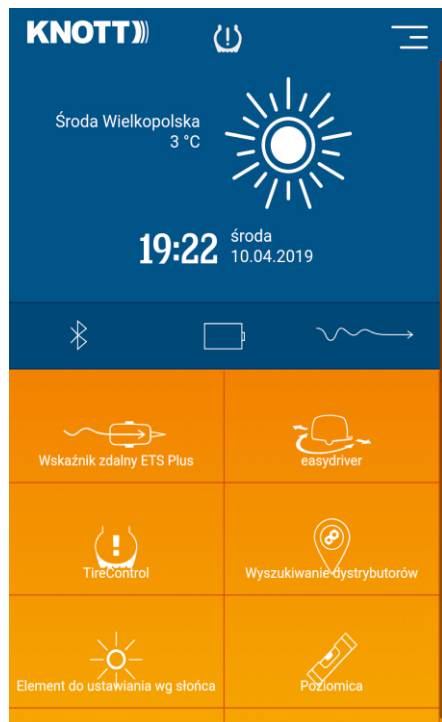

Our new system is above all:

- Easy installation of the external sensors(tool is included)
- Convenient display of sensor values via free KNOTT app
- Adjustable warning limits for too high / too low air pressure,
- Acoustic and visual warning of exceeded limits
- Tyre temperature monitoring
- Warning of rapid pressure drop or weak sensor battery
- Replaceable battery (Cr1632)
- Mechanical anti-theft device
- Simultaneous display of 2, 4 or 6 sensors

The tire pressure monitoring system TireControl is an additional display system for vehicles and trailers that do not have a control system as standard equipment. The sensor application is extremely simple and intuitive thanks to the KNOTT App

The KNOTT application contains various useful functions when traveling. Access to the "TireControl" menu can be obtained using the "TireControl" icon

The warning limits for tire pressure can be set using the sliders.

The status of assigned sensors is displayed in the basic view

Art. Nr. 210141.001

Technical data:

Voltage:	3 V
Working current:	< 15 mA do DC 3 V
Battery:	Cr1632
Battery life:	1 rok
Working temperature:	-20 °C do 85 °C
Max. humidity:	95%
Frequency of work:	2,4 GHz
Weight:	9,5g
Pressure measuring range:	0 do 6,3 bar
The temperature range:	-20 °C do 85 °C

For more details please contact Sales Department KNOTT Sp. z o.o.
