Accessories for caravan trailers

knott.pl

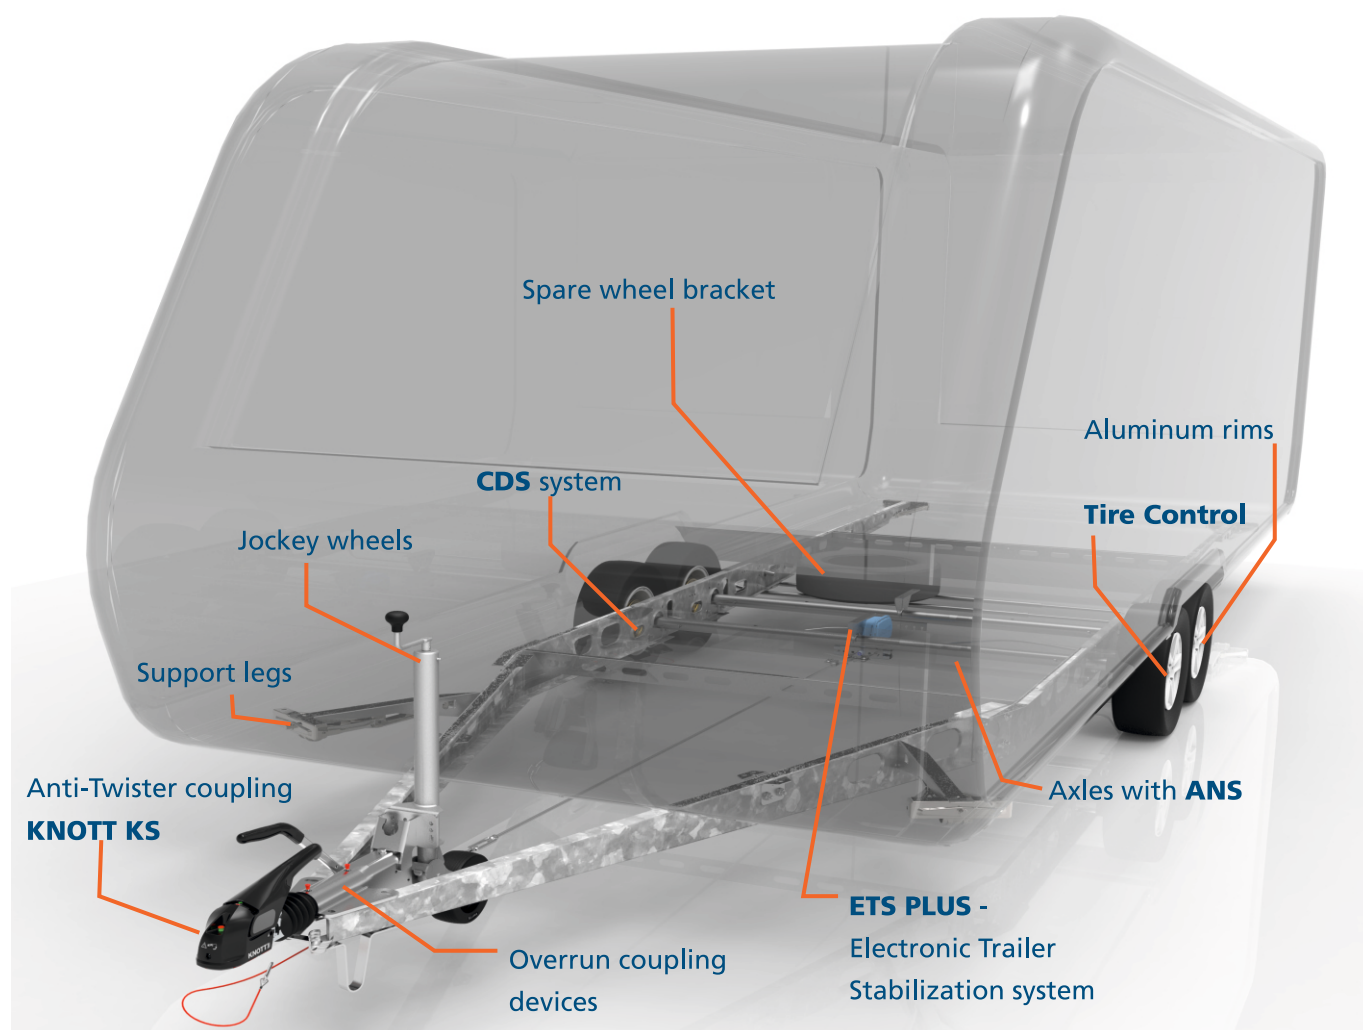

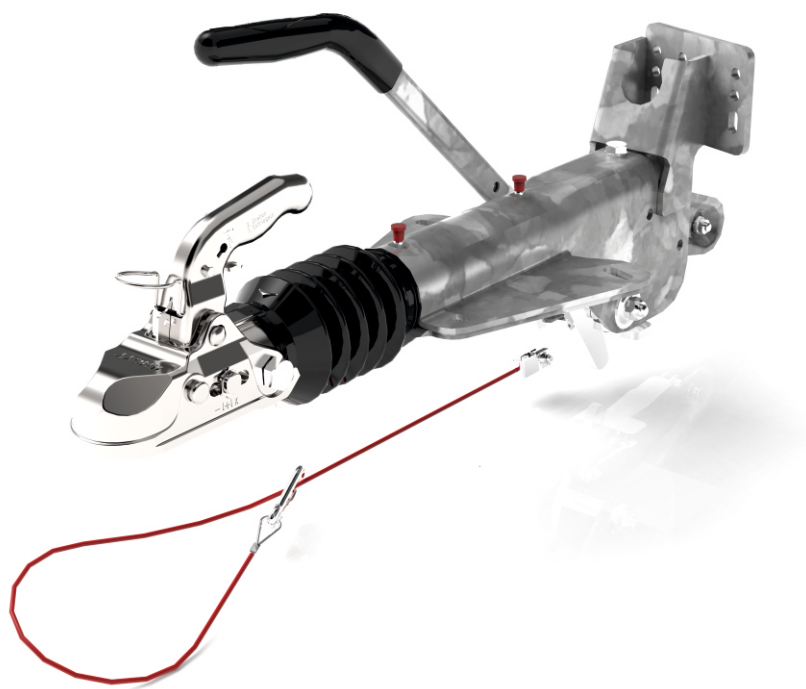

Dear Sirs,

in our offer you can find a number of components dedicated to caravans. These are primarily:

- overrun coupling devices,
- axles,
- KNOTT KS couplings,
- Electronic Trailer Stabilization system - ETS Plus,
- Comfortable Dumper System - CDS
- ANS system - automatic brake adjustment,
- tire pressure control system - Tire Control,
- spare wheel bracket dedicated for caravan frames
- KNOTT alloy wheels,
- trailer maneuvering system - Easy Driver

Overrun coupling devices for caravan trailers are selected for a specific trailer tonnage and scope of work.

We offer many jockey wheel console variants and parking brake levers, thanks to which we will certainly find a solution that suits your needs

We also offer a full range of braked and unbraked axles, which are almost made to measure.

The axles are offered in several suspension versions, so you can easily adjust the axle deflection characteristics to your needs.

The swingarm arm angle adjusted to your needs in combination with the axle supports gives enormous possibilities in adapting the axles to unusual solutions encountered in caravans.

Anti-Twister coupling - unique design and reliability

KS Anti-Twister couplings offered mainly for caravan users, for whom traveling comfort with a trailer is an indispensable part of every journey

The operating principle of the stabilizer is based on the use of friction linings pressing the hook ball directly. Unlike traditional ball hooks, a hitch with a stabilizer couples the trailer with the vehicle without the use of grease. The pressure of the lining allows for easier damping of vibrations, thus the risk of snaking is definitely smaller.

ETS PLUS: Stabilization system to prevent swaying of the trailer

A sensor integrated with the system controls the movements of the trailer, and special software analyzes the data in real time.

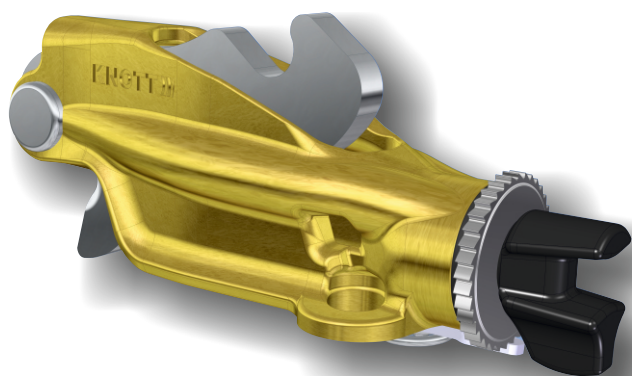

If the situation becomes critical, the system responds immediately. A specially developed algorithm, in a split second, applies the brakes and effectively prevents the trailer from rolling.

ETSPLUS
Elektronik Trailer Stabilisation System

The comfortable depreciation applicable shock absorbers of properly selected characteristics that enhance driving comfort of the trailer. The offer includes dampers that work to compression and stretching, making sure we choose the solution for your needs.

Connection of 4 rubber rollers with a shock absorber attached to the swingarm arm is the highest riding comfort for every trailer user.

The ANS system ensures a minimum distance between the brake drum and the brake shoes of our axles, thanks to which braking efficiency is always the highest.

Thanks to the use of ANS, safety in travel is always the highest and we can be sure that at the critical moment the brakes will work flawlessly.

We encourage you to use the ANS system combined with electronic stabilization of the ETSPlus trailer track. Both systems complement each other perfectly and ensure the highest standard of travel safety

Art. Nr. 210141.001

Tire pressure control system. It is offered as a set for one axle and equipped with a wireless sensor that allows easy measurement of pressure and temperature in the wheel.

The set is configured in such a way that you can easily mount the sensors on the wheels and then pair them with your phone via a mobile application.

The system via Bluetooth technology sends information about pressure and temperature in each wheel on an ongoing basis.

Art. Nr. 421241.001

Universal spare wheel bracket for use in caravans. A definite advantage is the possibility of using our company as well as our competitors equipped with components.

The bracket is mounted in the frame through the ribbed one holes made in the trailer frame side members.

While driving, it is secured with a screw and nut with a handle.

KNOTT alloy wheels are a unique design that will perfectly complement the appearance of your trailer. The most important advantages of these rims are:

- lower product weight - which translates into greater load capacity of the trailer,
- more attractive appearance - depending on the buyer's preferences we offer several designs,
- high accuracy - which results in high aesthetics,
- better heat dissipation from brake drums - especially

The KNOTT APP mobile application is the perfect complement to our products dedicated to caravans:

- direct contact with Knott service partners,
- dealer search via GPS system,
- controlling the ETS Plus system
- digital service book,
- access to current Knott catalogs and manuals,
- possibility to control the TireControl system,
- possibility to control the mover system by phone
