DIN40 Eyelet

knott.pl

Dear Sirs

Our products are constantly developed and modernized to meet your requirements, but also to reduce their weight, improve durability, facilitate assembly, ...

Below we present the modernization of the eyelet DIN40 - 98762093, whose casting has been modified so that it is possible to assemble in the same way as the couplings, that is, by applying it on the slide.

Thanks to this, it will definitely be easier and faster to replace the coupling by you.

In addition, we would like to remind you that our company's products are marked in accordance with applicable regulations in accordance with the guidelines of ECE Regulation 55.

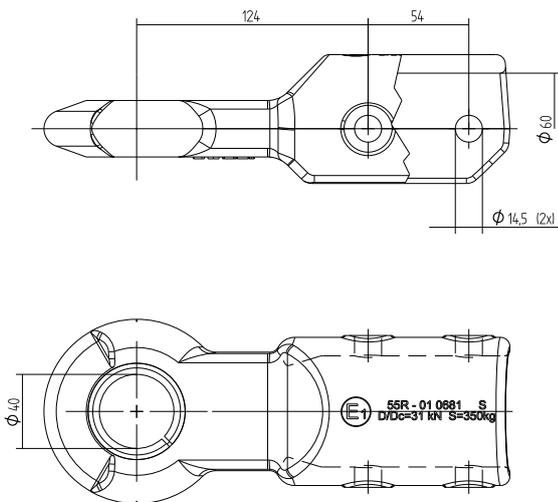

The designation according to EG has already been omitted on the occasion of structural changes, therefore we would like to point out that this should be verified with the entries in full truck approvals

Old one

New one

ECE-Genehmigungszeichen

E1 55R-010681

Genehmigungstyp
