## „V-Flange” drawbar KZE7,5

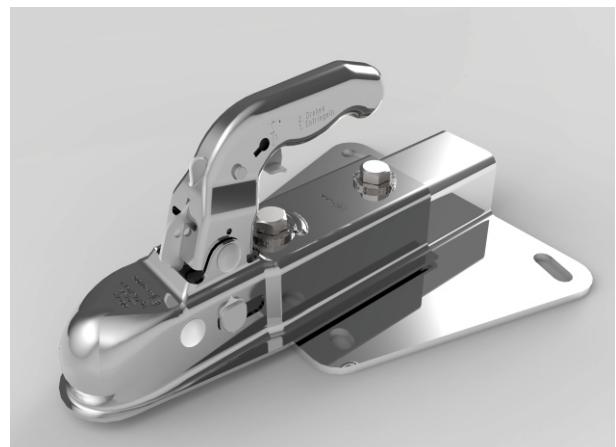

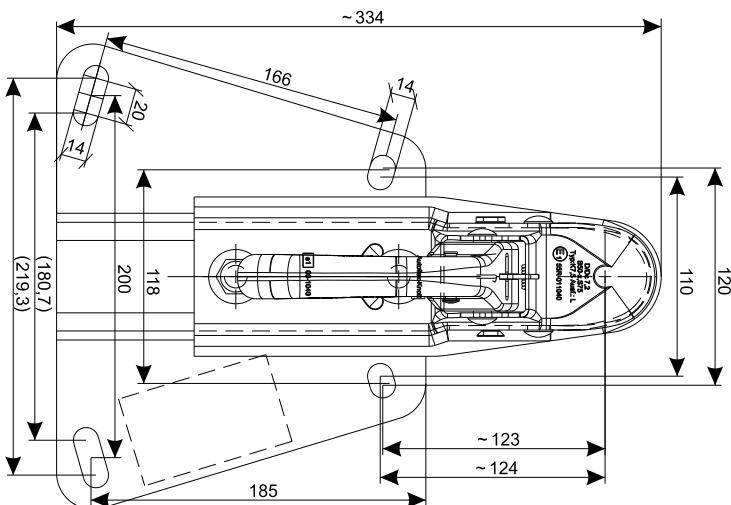

Dear Sirs,

To meet your expectations, we are constantly expanding our range with new product versions. On unarmed trailers up to 750 kg, a hook with a connector is a very important element. Due to the fact that every kilo counts, we would like to offer you a tin version of the connector KZE 7.5.

It is compact and lighter than a standard design with the use of a profile.

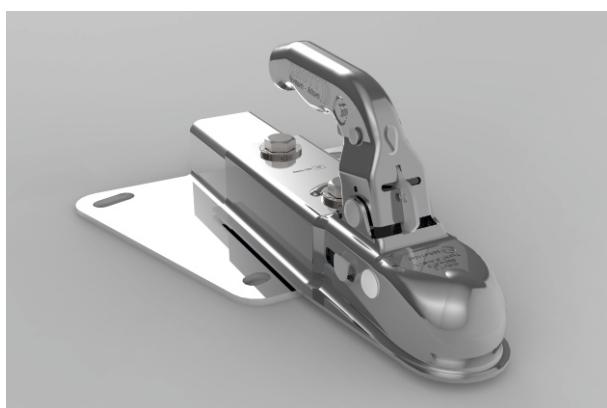

It is also very important that due to the avoidance of the welding process in the production, the aesthetics of the workmanship is increased, and there is no possibility of dirt appearing, which often appear after the galvanizing process at the joining of two elements.

We cordially invite you to take advantage of our offer, which we constantly adjust to your needs.

Art. No: **6A8528.001**

Up to 750 kg
