Tension belt

knott.pl

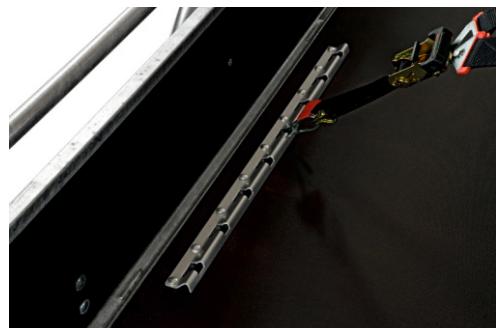

Dear Sirs,

We offer high quality transport belts that will secure your cargo very well.

The basic advantages are:

- The offered belt allows comfortable setting of the desired length,
- The design solution eliminates the appearance of disturbing belt fragments - the whole is aesthetically rolled up,
- Easy to use and secure,
- The retractor allows quick securing of goods,
- Both ends of the belt are equipped with a strong hook with a closure, which makes it easier to fasten the load,
- The closure is equipped with a red button that allows to use the self-retractor,
- In the case of this transport belt, it is possible to work in standard mode - the belt is locked and can be manually tightened with a standard tensioner handle,
- When loose, it is possible to loosen the belt by pulling one end of the belt,
- Setting the tensioner in the loose position allows the belt to be rolled up automatically by pressing the red button,
- If the self-retractor is used, it is still necessary to manually tighten the belt, which guarantees adequate belt tension and proper protection of the transported load.

| Name                             | Length<br>mm | Permissible load<br>daN |                  | Weight<br>kg | Art. Nr.   |
|----------------------------------|--------------|-------------------------|------------------|--------------|------------|
|                                  |              | load<br>on the support  | bursting<br>load |              |            |
| Tension belt<br>Belt width: 25mm | 1800         | 300                     | 600              | 0,70         | 416664.001 |
| Tension belt<br>Belt width: 25mm | 3000         | 250                     | 500              | 1,00         | 417050.001 |
