Drop support leg

knott.pl

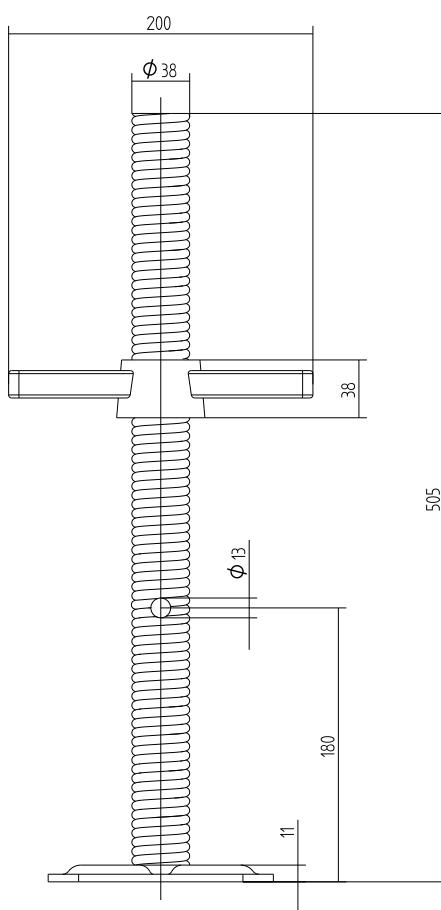

Dear Sirs,

We would like to offer a new type of side drop support leg. This type of support is very strong, and thanks to the use of a round thread it is characterized by high fatigue strength and allows very quick height adjustment. Thanks to the wide foot support can be successfully used in difficult terrain without the risk of displacement or damage.

The most important advantages of the offered support:

- outer diameter 38mm,
- corrosion resistance due to galvanizing dip galvanization,
- quick adjustment thanks to the nut butterfly
- high strength and stable support,
- maximum static load of 2500kg
- Art. No. 416987.001

Below we show several examples of use:
