Mudguards

knott.pl

Dear Sirs,

The components for the construction of trailers offered by us are characterized by the highest quality, which goes hand in hand with their unique functionality. Like every product, ours are constantly developed to meet your high demands.

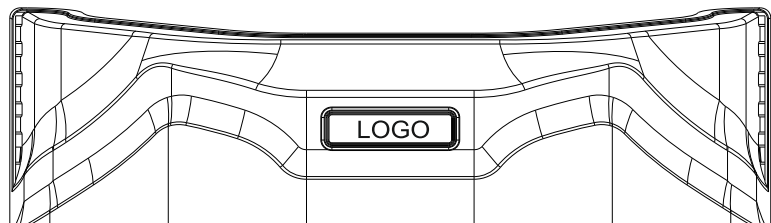

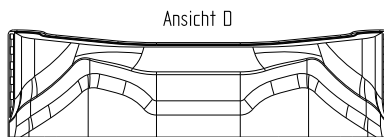

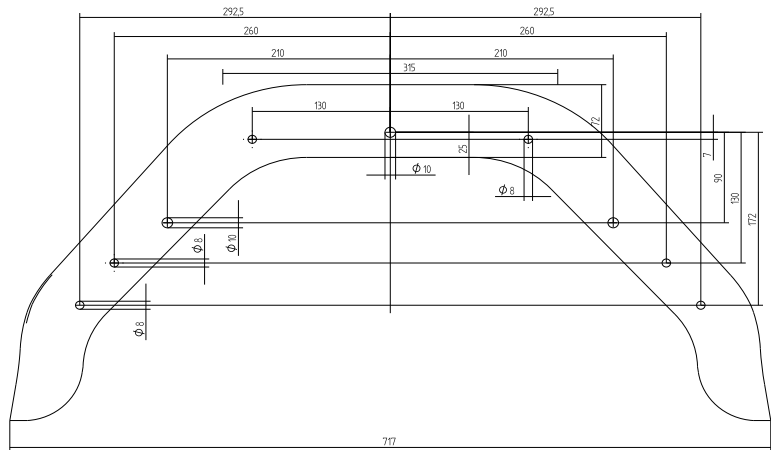

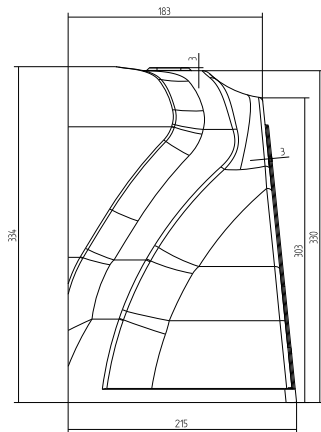

We are currently working on the development of our plastic mudguards. We want them to be well suited to your needs and to perfectly fit into the design of your chassis. Additionally, together with the mudguard, a mud flap will be offered, which will be easy to install thanks to the use of a special groove and will perfectly match the mudguard's cross-section.

6BG770.009	orange
6BG770.008	silver
6BG770.007	red
6BG770.006	blue without holes
6BG770.005	black without holes
6BG770.004	blue
6BG770.003	dark gray
6BG770.002	black
6BG770.001	light gray
<b>Art. Nr</b>	<b>colour</b>

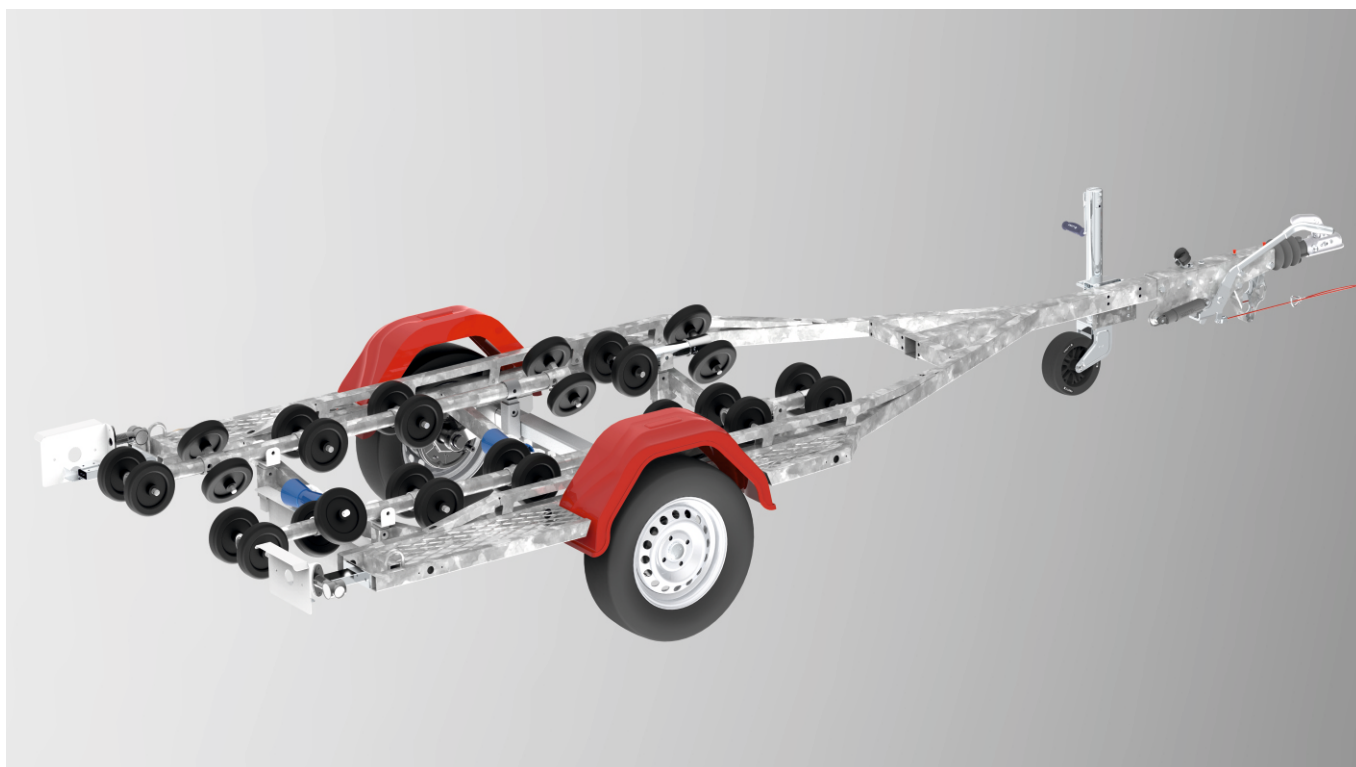

In the central part of the mudguard there is a field where you can mark the trailer manufacturer's logo and due to this, the product will more suit to your needs

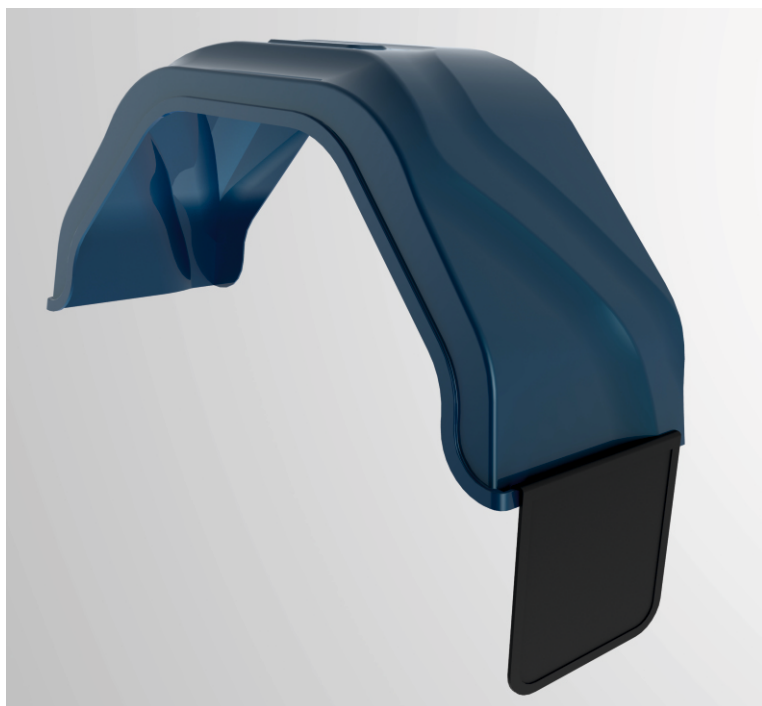

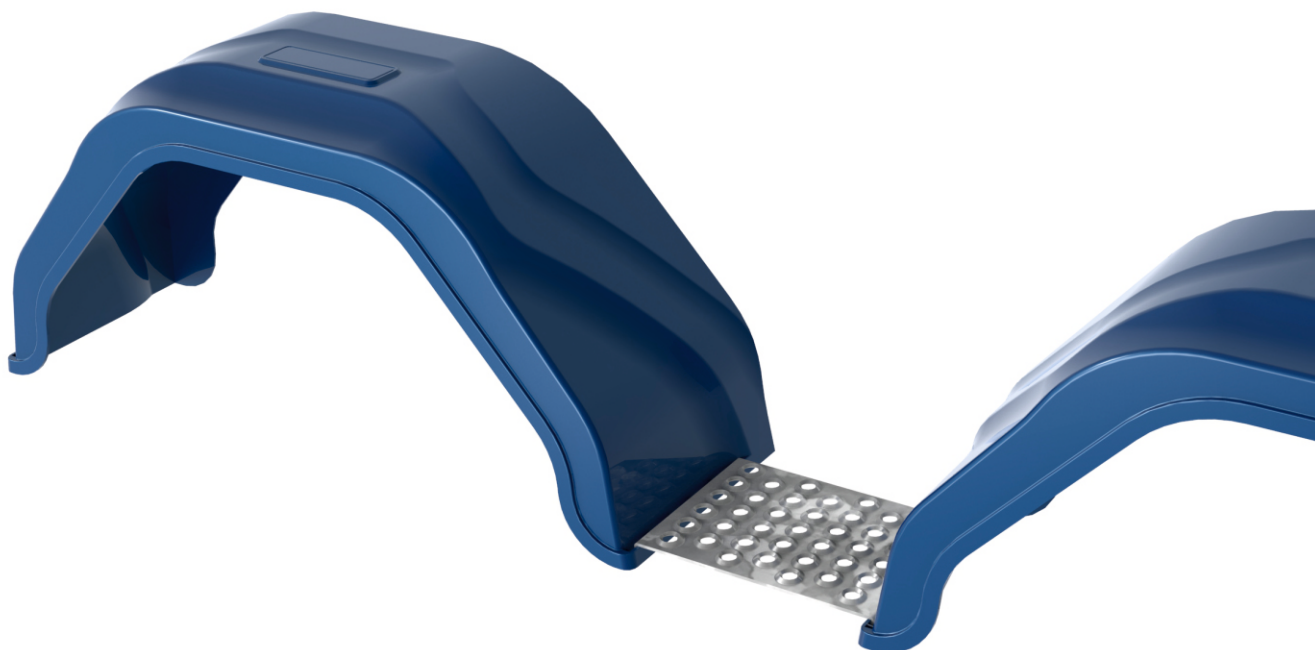

Below is an example of the use of our new type of mudguard.

The joining step between the mudguards is an option that will be available early next year

Mud flap will be available in different colors early next year. You can ask for personalized logo.

The tip of the mudguard is specially designed which helps in stacking the mudguards into each other so that it will be possible to put more of them on a pallet.
